PROFESSIONAL SUMMARY

Full Stack Developer specializing in Java, Spring Boot, and React.js, with experience delivering two production-grade enterprise applications end-to-end — from system design through deployment. Skilled in microservices, event-driven architecture with Apache Kafka, and secure RESTful API development using Spring Security and JWT. Comfortable working across the stack, including OLAP analytics with ClickHouse and responsive UI development with Tailwind CSS, with a track record of measurable performance and efficiency gains.

EXPERIENCE

Full Stack Developer — Solartis Technology Services Pvt. Ltd.

Jan 2025 – Present

- Owned end-to-end delivery of 2 enterprise applications across the full SDLC — from requirements gathering and system design through testing and production deployment.
- Engineered and documented 20+ RESTful APIs following REST best practices, reducing API defect rate by 30% through systematic testing in Postman and peer code reviews via Git.
- Partnered with a cross-functional team of 5+ engineers (backend, frontend, QA) to consistently deliver features on schedule across iterative development cycles.
- Strengthened codebase maintainability by establishing Git branching strategies, pull request reviews, and coding standards adopted team-wide.

PROJECTS

Explore — Data Migration Platform —

Jul 2025 – Present

Java, Spring Boot, Apache Kafka, MySQL, React.js, Tailwind CSS

- Architected a high-performance data migration platform using Spring Boot and Apache Kafka for event-driven, asynchronous streaming, processing 1M+ records and cutting manual migration effort by 60%.
- Implemented Spring JDBC with MySQL for optimized bulk data persistence and transaction management; enforced Role-Based Access Control (RBAC) with a full audit trail via Spring Security.
- Delivered a responsive React.js and Tailwind CSS frontend for real-time migration monitoring, reducing operator errors by 35%.

Reports — Business Intelligence and Reporting Platform —

Feb 2026 – Present

Spring Boot, Spring Security, JWT, JasperReports, ClickHouse, React.js

- Built a business intelligence reporting system using JasperReports for automated PDF and tabular report generation, eliminating 100% of manual reporting effort across 3 departments.
- Integrated ClickHouse (OLAP columnar database) for analytical queries on large datasets, cutting average report generation time by 40%.
- Secured the platform with JWT-based authentication via Spring Security and built interactive dashboards using React.js and Spring Boot RESTful APIs for real-time business insights.

TECHNICAL SKILLS

- Languages:** Java, JavaScript, SQL, HTML5, CSS3
- Backend:** Spring Boot, Spring Security, Spring JDBC, RESTful API Design, Microservices, Apache Kafka, Docker
- Frontend:** React.js, Tailwind CSS, Bootstrap, HTML5, CSS3
- Databases:** MySQL, ClickHouse (OLAP / Columnar)
- Reporting & Analytics:** JasperReports, ClickHouse Analytical Queries
- Security:** Spring Security, JWT Authentication, Role-Based Access Control (RBAC)
- Tools:** Git, GitHub, Postman, Eclipse, VS Code
- Concepts:** Microservices Architecture, Event-Driven Architecture, OOP, SDLC, Data Structures & Algorithms, DBMS

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering

PSNA College of Engineering and Technology, Dindigul | 2020 – 2024 | CGPA: 7.9
